Seed potatoes of the elite group “Krone” and “Galla” were delivered to Badakhshan.

The Gorno-Badakhshan Autonomous Region is one of the most beautiful corners of Tajikistan, which is always under the close attention of the Government of the Republic of Tajikistan.

In the direction of agricultural sector reform and the implementation of the state strategy for ensuring food security in the country, within the framework of the “Strengthening Resilience of the Agriculture Sector Project”, elite group seed potatoes “Krona” and “Galla” were delivered to seed farms in the Gorno-Badakhshan Autonomous Region through a convoy, along with the supply of mineral fertilizers.

At the same time, experts from the State Institution “Agriculture Entrepreneurship Development” provided valuable advice on the planting of seed potatoes, the application of mineral fertilizers, and the observance of agricultural techniques for its cultivation in seed farms.
