High harvest is guarantee of food security

Under sub-component 1.3: Reproduction of seeds, seedlings and planting material, elite wheat varieties such as “Grom”, “Alekseich” and “Bezostaya-100” were distributed among seed farms.

The objective of this sub-component is to build the capacity of public and private seed farms and nurseries engaged in reproduction of seeds, seedlings and planting materials and to establish distribution centers along value chains to process and sell high quality seeds, seedlings and planting materials produced for farmers. State seed farms and nurseries will be supported to improve their facilities and human capacity, while private seed farms and nurseries, including those managed by cooperatives, will benefit from human capacity building, including technical assistance. State seed farms include facilities managed either by TAU or research institutes affiliated with TAAS, while private seed farms and nurseries include facilities owned and operated by private organizations that are engaged in reproduction of seeds, seedlings and planting material in the Republic of Tajikistan.
