## **Compliance with safety requirements in TAAS scientific institutions**

This week, within the framework of the Strengthening Resilience of the Agriculture Sector Project, based on the agreement between the State Institution "Agriculture Entrepreneurship Development" and the Public Organization "Peshsaf", specialists of the Institute of Soil Science and Agrochemistry of TAAS sealed and removed obsolete chemical materials and pesticides. These materials were transported by a specialized vehicle to a special landfill for obsolete chemicals in Vakhsh district, in accordance with safety requirements.

Freshly produced chemical materials are required for soil and plant testing in laboratories of scientific institutions. Specific and accurate test indicators are the basis for increasing crop yields and are important for both specialists and farmers.
