**Congratulations from the Director of the State Institution
“Development of Entrepreneurship in Agriculture” Daler
Satori Abdumansur on the 34th Anniversary of Independence of
the Republic of Tajikistan**

Independence is the best benefit and the most precious value for every state and nation, the main factor of development and progress, as well as a condition for its consolidation in the international arena for development and protection of national and state interests.

National independence is the highest and most valuable achievement of a nation, the basis for a state existence, a symbol of statehood and patriotism, a sign of identity and freedom, a subject of pride and honor, the embodiment of the sovereignty and statehood of the Tajik people.

Thanks to the wise policy of the Founder of Peace and National Unity – the Leader of the Nation, the President of the Republic of Tajikistan, the respected Emomali Rahmon, during the independence period we were given the opportunity to worthily present the people of our country to the world.

Today, thanks to independence, the nation called “Tajiks” and the country called “Tajikistan” are known to all the planet people and have a special status in the world arena.

Independence for us is an outstanding sign of the state stability, the nation foundation and embodiment, a symbol of dignity and identity, a historical ideal and aspiration, international recognition and connection of independent Tajikistan with the civilized world, its honor and authority.

National independence is a sacred holiday for every nation, and protection and preservation of its foundations are the primary duty of every worthy country citizen.

In the modern world, full of contradictions, only a nation

with honor and respect can have real sovereignty in a free and independent state.

From the first days of gaining national independence, the valiant and heroic Tajik people participated in the restoration and formation of a new state and statehood foundations, ensuring the security and tranquility of society, political and economic stability, and launched a creative process for the Motherland prosperity: construction of power plants and tunnels, enterprises and institutions, highways that meet international standards. As a result, a lot of our problems have been solved today, and our hard-working people are ready to solve even larger development tasks.

We should be proud of our great nation and make every effort and diligence for its even greater glory.

That is why I want to wish the following: May the sacred holiday of Independence bring health, happiness and well-being, peaceful life, success and prosperity to every freedom-loving and sincere person in the country!

May national independence, like the high majestic peaks of the country, be unshakable and everlasting!
