Monitoring of the growth of seed potatoes in seed farms of the Sughd region

Specialists of the State Institution "Agriculture Entrepreneurship Development" within the framework of

Strengthening Resilience of the Agriculture Sector Project from July 16 to 20 this year reviewed the progress of field work and the current state of seed potato growth. They visited seed and dehkan farms in Shakhriston, Devashtich, Istaravshan and Isfara districts.

Last year after sowing quality seeds and following potato cultivation techniques farmers (beneficiaries) got high yield from potato fields and were satisfied with the result.

This year, taking advantage of favorable weather, they planted crops, including seed potatoes of elite varieties Picasso, Evolution and Arizona, in a timely and efficient manner and within the established deadlines. As a result, potato crop growth in each region is now quite high.

Specialists of the institution together with the heads of dehkan and seed farms, production and farming cooperatives "Farkhod", "Abdurakhimbek", "Ravshan" of the Shakhriston region, "Mukhamadaliev Alijon", "Jobirjon", "Sadullobobo", "Subkhonzoda", "Ovchii Gonchi", "Khodzhakho", "Khotam Gurbonov", "Gazantarik" and "Markazi Potato" of Devashtichsky district, "Obodoni" of Istaravshan and farm "Chorkukh" of Isfara visited seed potato growing areas. Potatoes of the elite varieties Picasso, Evolution and Arizona received high praise from experts and farmers.

Currently, protective measures against pests and inter-row treatments are being carried out in potato fields: fertilizing, loosening and weeding in accordance with agricultural cultivation techniques. Farmers are satisfied with the good growth of their crops and are busy with field work.

The institution's specialists provided farmers with useful scientific recommendations to promptly and quickly increase the yield of seed potatoes.

It is worth noting that from July 18 to July 20, 2024 in the

potato growing areas of the Sughd region a national seminar was held on the topic “Technology for growing potatoes in the mountainous and foothill regions of Tajikistan.”

The seminar was attended by the Deputy Prime Minister of the Republic of Tajikistan, Mr. Ziyozoda Sulaimon Rizoi, the Minister of Agriculture of the Republic of Tajikistan, Mr. Hakimzoda Kurbon, the Chairman of the Sughd region, Mr. Rajabboy Ahmadzoda, representatives of relevant committees and departments of the Republic, heads of individual cities and districts, representatives of the Ministry of Agriculture, the Sughd and Khatlon regions, cities and districts subordinate to the republic, the head office, board, departments and branches of agriculture, as well as farmers.

As part of this event, specialists from all cities and regions of the republic took part. Participants also got acquainted with the best practices of the beneficiaries of the Strengthening Resilience of the Agriculture Sector Project in the farms of the Maschoi Kuhi, Ayni, Shakhriston, Istaravshan and Devashtich regions.

Compliance with safety requirements in TAAS scientific institutions

This week, within the framework of the Strengthening Resilience of the Agriculture Sector Project, based on the agreement between the State Institution "Agriculture Entrepreneurship Development" and the Public Organization "Peshsaf", specialists of the Institute of Soil Science and Agrochemistry of TAAS sealed and removed obsolete chemical materials and pesticides. These materials were transported by a specialized vehicle to a special landfill for obsolete chemicals in Vakhsh district, in accordance with safety requirements.

Freshly produced chemical materials are required for soil and plant testing in laboratories of scientific institutions. Specific and accurate test indicators are the basis for increasing crop yields and are important for both specialists and farmers.

REQUEST FOR EXPRESSIONS OF INTEREST
(CONSULTING SERVICES – FIRMS SELECTION)

Republic of Tajikistan

Strengthening Resilience of the Agriculture Sector Project

Grant No.: D860-TJ

Assignment Title: Preliminary and detailed examination of the building of the Center laboratory of the State Committee of Food Security.

Reference No. SRASP AF-2023-CS-CQS

A. Introduction.

The Strengthening Resilience of the Agriculture Sector Project is an IDA grant in the amount of US\$ 108 million prepared to support Tajikistan for the purpose of foundations for a more resilient agriculture sector referring to the availability of public agricultural services, including improved seeds, seedlings, and planting materials; agri-logistical services; agrometeorological information, soil testing, locust control and crop protection.

The project aims to support the Government of Tajikistan (GoT) in successfully transitioning to a sustainable, more productive, climate resilient, and inclusive model of agricultural sector growth. The proposed project will help to:

1. increase the availability of improved seeds, seedlings, and planting materials that are climate resilient,

affordable, farmer-preferred, and well adapted to the different agro-ecological conditions of Tajikistan;

2. improve the access to improved agri-logistic services of farmers and agri-businesses; and
3. strengthen the crisis management, i.e. early warning, preparedness, and response capacity of selected public institutions.

All activities related to human resource development and capacity building will include topics on understanding climate change better and frameworks, tools, and techniques to facilitate designing and implementing climate adaptation and mitigation approaches. The Project is implemented by State Institute "Agriculture Entrepreneurship Development" Project Management Unit (SI AED PMU).

B. General scope of the services.

4. Instrumental inspection with identification of defects.
5. Performing verification calculations.
6. Tentative assessment of the condition of constructions.

Stage 2 (Detailed Examination)

1. Geological survey
2. Sampling and testing of materials.
3. Testing of inspected constructions by non-destructive methods
4. Processing of results and their evaluation
5. Testing of concrete strength of constructions, permeability of concrete, frost resistance of concrete.
6. Checking the strength of stones and mortar, frost resistance of stones, thickness of masonry joints, void

size and moisture content of masonry.

7. To check with the design the number and location of reinforcement, the strength of reinforcement, to analyze that during the installation of reinforcement laying deviations from the project in reinforcement were made.
8. Drawing a conclusion on the results of the detailed inspection

Gradual growth of crop yields

As the Founder of Peace and National Unity, Leader of the Nation, President of the Republic of Tajikistan Emomali Rahmon noted at the meeting with farmers: "We have favorable natural conditions and necessary resources. If we use them wisely and efficiently, we will be able to provide the country's population with food and solve the issue of food security – one of our national goals".

Specialists of the State Institution "Agriculture Entrepreneurship Development" together with the project beneficiaries constantly monitor the current state of crops nationwide and constantly take measures for their cultivation and growth.

This year, farmers in Sughd and Khatlon regions participating in the project have effectively utilized every inch of their fertile land. In accordance with the plan, they sowed elite seeds of Lazer, Lima and Ramses varieties on an area of 3,123 hectares (Sughd region – 800 hectares, Khatlon region – 2,323 hectares). Currently there are 2 to 5 pods on each plant.

Cotton fields are growing very well and agro-technical works are carried out gradually.

Farmers are determined to increase cotton yields by using quality seeds and strictly following agrotechnical methods of cultivation. Like last year, they are aiming for a high and quality harvest.

August 9, 2024

Monitoring of field works in Tajikabad and Lakhsh districts

The development of the agrarian sector is considered one of the priority directions of the Government of the Republic of Tajikistan, which constantly takes necessary measures to provide the population with food.

With the support of the Government of the Republic of Tajikistan, the State Institution "Agriculture Entrepreneurship Development" within the framework of the Strengthening Resilience of the Agriculture Sector Project has been providing seed and vulnerable farms with various seeds of elite group of crops for two years. Following agrotechnical rules, farmers (beneficiaries) were able to get the desired harvest last year due to sowing of quality seeds.

This year they also took advantage of the favorable weather and started sowing crops, particularly seed potatoes, in a timely manner.

On the second and third days of the working visit, the specialists of the institution visited agricultural lands, in particular, seed potato fields of elite varieties Evolution and Arizona, on farms "Sari Nai" and "Firdavs" of Tajikabad district, as well as on farms "Mirshodi Arzangi", "Kand", "Sarchashma", "Buston" and "Gandumak" of Lakhsh district. As a result of this inspection, the specialists highly assessed the growth of crops. Currently, agro-technical works on the fields are carried out uninterrupted and the yield of all crops is good.
