Repair and reconstruction works at the SUE “Center for Digitalization and Advanced Training of Agricultural Personnel”

The Government of the Republic of Tajikistan annually pays great attention to the development of various sectors of the country and constantly takes necessary measures to create good conditions.

This year, with the support of the Government of the Republic of Tajikistan, the State Institution “Agriculture Entrepreneurship Development” in the frame of “Strengthening Resilience of the Agriculture Sector Project” carried out repair and reconstruction works and put into operation a number of scientific and educational buildings of the Ministry of Agriculture of the Republic of Tajikistan and the Tajik Academy of Agricultural Sciences.

Under the third component of the “Strengthening Resilience of the Agriculture Sector Project” the building of the SUE “Center for Digitalization and Advanced Training of Agricultural Personnel”, with two floors and a basement, with an area of 2528 square meters are completely covered by capital renovation works by replacing doors, windows, lamps, and roof.

The repair and reconstruction work on the second floor of 18 offices with an area of 480 square meters, a corridor with an area of 116 square meters and the roof of the building with an area of 660 square meters was completed. The repair and reconstruction works continue in another part of the building.

Presently repair and reconstruction work is carried out in the basement, first floor, and outside of the building with an area of 1530.65 square meters, with a modern design by replacing doors and windows, floors, ceilings (roof), and chandeliers and is expected to be completed in the near

future.

Contractors and workers involved in repair works take into account all the nuances of repair and construction works and perform them qualitatively, in accordance with construction standards.

After completion of repair and reconstruction works in the frame of the project, the State Institution intends to equip the SUE "Center for Digitalization and Advanced Training of Agricultural Personnel" with modern equipment to make the work of specialists easier and more efficient.

Working session with the Public Organization “Umedbaksh”

On December 18, 2024, a working session with Public Organization “Umedbaksh” was held in the hall of the State Institution to expand outreach and advisory services on Implementation of a Grievance Redress Mechanism and to conduct information campaigns on the activities of “Strengthening Resilience of Agriculture Project”.

During the meeting, the issues related to implementation and transparency of the project activities were analyzed and discussed in order to carry out works and solve existing problems, receive and consider timely appeals, complaints, and proposals of farmers, members of jamoats, and collectives that are beneficiaries of the project.

In addition, the Public Organization “Umedbaksh” presented to the management of the institution the schedule of work according to the terms of reference and the methodology of promotion of consulting services in the implementation of the project in 60 pilot districts of the Republic of Tajikistan.

**Working session on distribution of vitamins and micronutrients
in the frame of “Strengthening Resilience of Agriculture
Project”**

“The health of the nation is an invaluable asset, without
which it is impossible to imagine the strength of the state”

Emomali Rahmon

Nowadays, the Government of the Republic of Tajikistan
constantly strives to improve the health and protection of the
population and shows great interest in food security and
healthy nutrition issues.

As it is known, food issues are considered a critical issue
not only in Tajikistan, but all over the world. In some
countries, the population suffers from hunger, in others from
food shortages, and in thirds people struggle with obesity.

For this purpose, this year, with the support of the
Government of the Republic of Tajikistan and the World Bank

Group, the State Institution “Agriculture Entrepreneurship Development” in the frame of the Strengthening Resilience of Agriculture Sector Project, aimed at protecting the health of mother and child has imported vitamins and micronutrients, such as S1550005 – 60 mg of iron + folic acid/PAC – (10×10) in the amount of 353,000.00 packs and S1580201 vitamin-mineral powder (SPRINKLE) PAC – 30 in the amount of 1 300,000.00 packs to the Republic of Tajikistan.

Hence, on December 19, 2024 a meeting on the official distribution of vitamins and micronutrients was held in the hall of the Ministry of Health and Social Protection of the Population of the Republic of Tajikistan.

The meeting was attended by deputies and responsibilities of the Ministry of Health and Social Protection of Population of the Republic of Tajikistan, Head of the Department of Agrarian Policy and Food Security Monitoring of the Ministry of Agriculture of the Republic of Tajikistan, representatives of the World Bank Group, Acting Head of the United Nations Children’s Fund (UNICEF) Office in Tajikistan, Director and staff of the State Institution “Agriculture Entrepreneurship Development”.

The purpose of this event is to maintain public health, especially to improve the health status of mothers and children, as well as the proper use of micronutrients and vitamin supplements by target groups (pregnant women and children aged 6 months to 59 months).

The first deputy Minister of Health and Social Protection of Population of the Republic of Tajikistan, Mr. Muhsinzoda Gafur, opened the meeting and noted that the issue of mother and child health protection is one of the main priorities of the Government of the Republic of Tajikistan and the Ministry of Health and Social Protection of Population of the Republic of Tajikistan. The Ministry of Agriculture of the Republic of Tajikistan is also constantly taking necessary measures for

food safety and food production among the population.

The Ministry of Health and Social Protection of the Population of the Republic of Tajikistan has held a number of activities to prevent micronutrient deficiencies among children and women, and in order to improve the health of children and prevent infectious diseases, vitamin A supplementation has been carried out twice a year at the national level for children aged 6 to 59 months in the last 10 years.

After representative of World Bank Group Hasem Ibragim Hanbal, Deputy minister of Health and Social Protection of the Population of the Republic of Tajikistan, Zulfiya Abdusamatzoda, Head of the Department of Agrarian Policy and Food Security Monitoring of the Ministry of Agriculture of the Republic of Tajikistan Abdullozoda Ahmadjon, Acting Head of the United Nations Children's Fund (UNICEF) Office in Tajikistan, director of State Institution "Agriculture Entrepreneurship Development", Daler Satori made comprehensive remarks on this issue.

The State Institution presented a documentary film to the audience after the speeches.

Inspection process and monitoring of the storage and disposal status of hazardous chemical waste

With the support of the Government of the Republic of Tajikistan, the State Institution “Agriculture Entrepreneurship Development” in the frame of the third component of “Strengthening Resilience of the Agriculture Sector Project” in the period of independence for the first time introduced a method of disposal of obsolete chemical materials and pesticides and containers that used chemical solutions in scientific and educational institutions of the Ministry of Agriculture of the Republic of Tajikistan and the Tajik Academy of Agricultural Sciences.

This action is implemented on the basis of a contract between the State Institution “Agriculture Entrepreneurship Development” and the Public Organization “Peshsaf”.

According to the signed contract with this public organization, chemical materials and reagents, which are included in group A of hazardous waste and expired, empty

containers, in which chemical solutions were used, were collected in accordance with the schedule, from the warehouses of the State Institution for Plant Protection and Chemicalization of Agriculture, Institute of Soil Science and Agrochemistry of TAAS, Agrarian University of Tajikistan named after Sh. Shohtemur and the State Institution "Locust Control Expedition" and transported to a special warehouse "Vakhsh".

In this context, in the frame of the project was an official visit of specialists to the inspection process and monitoring of the storage status and disposal of hazardous chemical waste transported from the above-mentioned facilities to the special territory "Vakhsh".

During the monitoring it was found that the waste was placed in two containers of 3 m by 12 m, in accordance with the requirements of environmental and social norms and the legislation of the Republic of Tajikistan "On placement of waste in special places", will be temporarily stored in this place, then it will be destroyed.
