## **PUBLIC HEARINGS BEFORE STARTING THE INNOVATIVE GREENHOUSE CONSTRUCTION IN DANGARA DISTRICT**

On June 9 this year, the sociologist and ecologist of the “Agriculture Entrepreneurship Development” State Institution within the framework of the “Strengthening Resilience of the Agriculture Sector Project” with participation of responsible persons from the executive body of the Dangara district state authority held public hearings with residents of neighborhoods adjacent to the construction site and the construction company “Abosiyon” LLC employees, who participated in the modern greenhouse construction.

The meeting was opened by Dangara district Deputy Chairman Amonullo Habibzoda, who appreciated the Republic of Tajikistan Government, especially the Founder of Peace and National Unity, Leader of the Nation, respected Emomali Rahmon, as well as the State Institution “Agriculture Entrepreneurship Development” and expressed gratitude for continuous support of farmers with agricultural machinery and equipment, high quality seeds, construction of modern greenhouse and other necessary facilities.

Afterwards, Rano Rakhmatova, the Institution sociologist, spoke about the continuous support of the Republic of Tajikistan Government in the agricultural sector development, providing population with new jobs, construction of modern greenhouses and their effective use, as well as about the project implementation, considering the works peculiarities for timely and qualitative completion of this facility.

During the hearings, the “Abosiyon” LLC construction company director made a detailed presentation with their work plans to implement construction of the greenhouse, which will be built according to the new modern design and with high quality.

Besides, at the stage of starting the mobilization works, the

Institution specialists presented the environmental management plan considering the stakeholders' opinions, proposals and results of environmental impact assessment according to the World Bank requirements of social and environmental standards and the detailed information on compliance with sanitary and hygienic rules, safety precautions, the Republic of Tajikistan current legislation requirements and norms, mechanism of considering the applications and proposals, as well as compliance with other applicable laws.

At the end of the public hearings, the authority's management gave specific assignments and instructions to the officials on the upcoming plans timely implementation.

In the afternoon, the Institution sociologist and ecologist together with the commission visited the information stands and the box for complaints and suggestions in Dangara district.

**COMPLETION OF REPAIR AND RENOVATION WORKS IN THE ACADEMY OF AGRICULTURAL SCIENCES INSTITUTE OF THE SOIL SCIENCE AND AGROCHEMISTRY 11 SOIL ANALYSIS LABORATORIES**

The TAAS (Tajik Academy of Agricultural Sciences) Institute of Soil Science and Agrochemistry was founded during the Soviet period and since that time has been actively working for the agricultural sector development.

At the first stage, with the support of the Republic of Tajikistan Government and the State Institution "Agriculture Entrepreneurship Development" within the framework of the "Strengthening Resilience of the Agriculture Sector Project", the roof of the main building, assembly hall and facade of the Institute of Soil Science and Agrochemistry were completely repaired; this year, the entrances, corridors and 11 laboratories of soil analysis in this scientific institution were overhauled.

High-quality repair and rehabilitation work implemented by the contractor organization on the scientific institution

territory has been ongoing for five months; this week, the work results were inspected by the Tajik Academy of Agricultural Sciences President, the State Institution "Agriculture Entrepreneurship Development" management and other officials. During the inspection, useful recommendations were given to officials on quality installation and connection of modern laboratory equipment.

The specialists are making all possible efforts to install modern equipment in 11 soil analysis laboratories of the scientific institution in due time and put into operation within coming days.

## **PUBLIC HEARINGS BEFORE STARTING AN AGROLOGISTICS CENTER CONSTRUCTION IN THE J. BALKHI DISTRICT**

The Government of the Republic of Tajikistan annually pays great attention to the sustainable development of the country various sectors and constantly takes necessary measures to implement the plans.

On June 3 this year, engineers and specialists on social and environmental issues from the State Institution “Agriculture Entrepreneurship Development” within the framework of the “Strengthening Resilience of the Agriculture Sector Project” held public hearings with participation of officials from the Executive Body of the J. Balkhi district State Authority, residents of neighborhoods adjacent to the construction site, as well as “Stroy-Center” construction company employees involved in the agrologistic center construction.

During the meeting, Deputy Chairman of J. Balkhi district Kurbonzoda Kurbonali and the SI AED specialist on social issues Rano Rakhmatova spoke about the Government of the

Republic of Tajikistan constant support in development of the agricultural sector and providing the population with permanent jobs; the participants spoke about the benefits of agrologistic centers for population and project implementation, considering the work features for timely and quality completion of this facility.

Afterwards, the “Stroy-Center” Construction Company engineers made informative presentations and presented their work plans to implement the agrologistic center construction to the audience.

Besides, at the initial stage of mobilization, the works on implementation of environmental management plan will be done considering the stakeholders’ opinions, proposals and results of the environmental impact assessment according to the World Bank requirements of social and environmental standards; the detailed information was provided on compliance with sanitary and hygienic rules, safety measures, fulfillment of requirements and norms of the Republic of Tajikistan current legislation, mechanism to consider applications and appeals, as well as implementation of other applicable laws.

At the end of the public hearings, the responsible persons were given specific instructions and tasks for timely implementation of upcoming plans.

In the afternoon, the SI AED engineers and specialists on social and environmental issues visited the site of this facility.

## **PROGRESS OF TESTING THE GRAIN CROPS IN THE SUGHD REGION**

Every year, agriculture specialists implement testing to determine the biological yield of agricultural crops.

Specialists from the State Institution “Agriculture Entrepreneurship Development” within the framework of the “Strengthening Resilience of the Agriculture Sector Project” together with specialists from the Ministry of Agriculture and the Food Security Committee began testing the grain crops in the Sughd region.

During testing, the team determines the expected biological

yield and takes measures to implement the long-term plan.

Specialists started the testing work in the fields of the Sohibjon farm of J. Rasulov district and the Ravshanbek farm of Shahrison district.

It should be noted that this year, as part of the “Strengthening Resilience of the Agriculture Sector Project”, farm managers received high-quality certified seeds of the “elite” category from the institution, varieties Timiryazevka 150 and Alekseich distinguished by high yield and adapted to local climatic conditions.

During testing, it was determined that farmers (project beneficiaries) implemented agricultural work in a timely and high-quality manner, which will enable a high wheat yield of 60-65 c/ha in future

## **PROGRESS OF APPROBATION WORKS IN KHATLON REGION**

Specialists of the State Institution “Agriculture Entrepreneurship Development” within the framework of the “Strengthening Resilience of the Agriculture Sector Project” together with specialists from the Ministry of Agriculture and Food Safety Committee implement approbation in Khatlon oblast.

During the approbation, the team determines an expected harvest and takes measures to fulfill its plan.

The high-quality seeds provided to the farmers (beneficiaries) under the “Strengthening Resilience of the Agriculture Sector Project” have a lot of advantages over local ones and have such quality as increased yield.

By using the high-quality seeds, farmers in the country (project beneficiaries) have proven that these seeds guarantee high yields, and as a result of following the agronomic cultivation practices, they have been able to significantly improve the quality of the obtained agricultural crops harvest.

At present, the agricultural industry specialists in Khatlon oblast are actively continuing approbation of agricultural crops, especially cereals (wheat), and determining their expected yields.

Analysis of the approbation results shows that the agricultural crops yield, especially cereals (wheat), is higher than last year, and the harvest quality has also improved.

## **Congratulations of the State Institution “Agriculture Entrepreneurship Development” Director, Honored Daler Satori Abdumansur, on May 23 – Youth Day**

When it comes to youth, the words of the Founder of Peace and National Unity, Leader of the Nation, President of the Republic of Tajikistan respected Emomali Rahmon immediately come to mind: “Today, youth, as the continuers of our high goals implementation, with unwavering determination strive for development and progress of Tajikistan by achieving unique accomplishments in many spheres”.

Indeed, Tajikistan young people consider themselves the continuators of the country’s leadership high goals, having chosen the great school of patriotism of the Founder of Peace and National Unity, Leader of the Nation, President of the Republic of Tajikistan respected Emomali Rahmon as a great lesson of life and proudly implement their great historical responsibility and glorious filial duty.

In this process, the youth, as creators of the Motherland future, true and dedicated followers of the Founder of Peace and National Unity, Leader of the Nation, President of the Republic of Tajikistan, respected Emomali Rahmon, take all necessary measures for the ever-increasing development and progress of the country, and as the driving and motivating force of the Tajikistan new society, direct its activities towards implementation of creative and innovative goals.

Our country is one of the youngest in the world, the majority of which are young people, who are the main driving force of the country development.

Effective implementation of the state policy regarding youth has been the focus of the Government of the Republic of Tajikistan since the first days of independence. In his speeches, the Head of the country, the Founder of Peace and National Unity, the Leader of the Nation, the President of the Republic of Tajikistan respected Emomali Rahmon has repeatedly

stated: "We must create all conditions for young people, who are the future of the nation, and educate them in the spirit of patriotism, self-consciousness and national pride".

This is indeed true as the future of the country and the nation is in the youth hands. They represent a country and a nation. It is impossible to imagine a country without educated, erudite and talented young people, who are the future builders of society today and tomorrow.

By their knowledge, abilities and strength, young people have participated in various regional and international competitions and won prizes, are gaining more and more fame and strengthen the reputation and influence of our beloved Motherland in the international arena.

The Head of State, the Founder of Peace and National Unity, the Leader of the Nation, the President of the Republic of Tajikistan respected Emomali Rahmon pays special attention to supporting the youth and providing it with new jobs based on the use of information and communication technologies and knowledge of foreign languages, constantly supports their proposals for development of our beloved Motherland, creates favorable working conditions and is fully confident in their abilities and professional skills.

Indeed, today the youth of the country is actively involved in various sectors of the national economy: politics, economy and society, culture, health care and industry, agriculture and other spheres, making a worthy contribution to development and progress of our beloved Tajikistan.

On these joyful days I would like to sincerely congratulate you, my dear colleagues, and in your person all youth of our beloved country with Youth Day on May 23, wish you prosperity, happiness and victories, and to our independent Tajikistan – eternal peace and stability.

**Monitoring the distribution of microelements and vitamins in the towns and districts of Sughd region**

“Nation health is an invaluable asset, without which it is impossible to imagine a state strength”

This week, the State Institution “Agriculture Entrepreneurship Development” specialists together with the public organization “Avesto” employees monitored the distribution of microelements and vitamins in the towns and districts of Sughd region (Khujand town, B. Gafurov and J. Rasulov districts).

A working meeting was held with Muhiddin Habibullo Khairullozoda, Head of the Regional Health Department.

During the meeting, the parties expressed their opinions on the issues of providing the target population (pregnant women and children aged 6 to 59 months) with micronutrients and vitamins, the activities of reproductive health centers and health centers of the towns and districts of Sughd region in this direction, as well as food fortification for protection of public health and prevention of nutrition-related diseases.

Afterwards, the working group met with officials and staff of reproductive health centers and child disease centers in Khujand town, B. Gafurov and J. Rasulov districts and checked the process of documenting and distributing micronutrients and vitamin supplements to the target population, including pregnant women and children aged 6 to 59 months.

Conversations were held with patients using micronutrients and vitamins.

The patients stated that their health improved after using health products (micronutrients and vitamin supplements). They also expressed their gratitude and endless appreciation to the

Government of the Republic of Tajikistan and the State  
Institution "Agriculture Entrepreneurship Development" for  
their continued support.
